

WELCOMING ADDRESS DEAN FACULTY OF MECHANICAL AND MANUFACTURING ENGINEERING

Assalamualaikum warahmatullahi wabarakatuh and good day.

I would like to take this opportunity on this occasion to congratulate you for being successfully selected to further your study in engineering in the Faculty of Mechanical and Manufacturing Engineering (FKMP), UTHM, for the academic session of 2009/2010. You are all very fortunate compared to your other friends that are still searching for places in the institution of higher learning. This is a great opportunity for you to seek knowledge and build up a career for the future.

Based on the mission of the university, to produce and train professionals and technologists with high morals, ethics and competence, you will be taught and guided by professionals and committed lecturers. FKMP through its programme offers core Mechanical and Manufacturing engineering knowledge that are essential to the profession and also offer specific skills that are focus toward areas like mechanics, material, design, production, plant and automotive engineering. To reinforce the learning processes the faculty is also equipped with laboratories and workshops with the latest technology and appropriate equipment. Trained and experienced technicians will assist and guide student in their workshop practices. You will also be able to do industrial exposure as well as industrial training in industry according to the program requirements.

Therefore, you will have a lot of opportunities, to acquire advantages and strength in learning various knowledge and skills in Mechanical and Manufacturing Engineering in this faculty because UTHM possessed excellent infrastructure and modern facilities couple with excellent teaching and learning system that are balanced between theory and practical. Therefore you should work very hard to fulfil your ambition, your parent wishes, the industrial needs as well as the aspirations of the country. Your future success is our utmost wish.

Thank you.

Prof. Dr. Sulaiman bin Hj. Hasan

Dean

Faculty of Mechanical and Manufacturing Engineering
