YEAR 1

**YEAR 1
SEMESTER I**

UMB 1042 TECHNICAL WRITING

SYNOPSIS :

This course introduces students to report writing skills needed at tertiary level. Students will learn basic report writing skills such as proposals, progress report and analytical report. In order to do this, they will learn how to collect data using questionnaires. The data collected will be analyzed, transferred into graphic forms and presented orally and in writing. Prior to that, students will also be trained to polish up their skills in narrative and descriptive essays using accurate grammar, vocabulary and sentence structure.

7. Dorothy Cheung et. al. (1999). *Report writing for engineering students*. 2nd ed. Singapore: Prentice Hall.

UMA 1162

ISLAMIC AND ASIAN CIVILISATION

SYNOPSIS :

The course discusses introduction to civilization, its development, interaction between civilization; the Islamic civilisation, Islam in the Malay civilisation; Indian and Chinese civilisations as well as contemporary civilisation issues and also the principles of Islam Hadhari.

UQ* 11**

CO-CURRICULUM

SYNOPSIS :

Matapelajaran ini ditawarkan dalam bentuk pelbagai aktiviti pilihan untuk pelajar peringkat Sarjana Muda dan Diploma. Tiga bidang aktiviti yang ditawarkan adalah Sukan & Rekreasi, Kelab/Persatuan dan Persatuan Beruniform.

BSM 1913

ENGINEERING MATHEMATICS I

SYNOPSIS :

Had: teknik untuk mengira had. Keselajaran. Pembezaan dan kegunaan. Teknik pembezaan: hasil darab, hasil bahagi, petua rantai, pembezaan tersirat dan terbitan berulang (tinggi). Terbitan bagi fungsi tersirat, berparameter dan fungsi songsang. Penggunaan: kadar perubahan, masalah maksimum dan minimum. Petua L'Hopital untuk jenis $0/0$, ∞/∞ , $0 \cdot \infty$, ∞^0 , 1^∞ , $\infty - \infty$. Teknik kamiran : kaedah gantian, bahagian demi bahagian, kamiran fungsi nisbah, kamiran fungsi trigonometri berkuasa, fungsi nisbah melibatkan sinus dan kosinus, kamiran fungsi hiperbolik, dan gantian trigonometri dan hiperbolik. Lanjutan pembezaan dan kamiran : membeza dan mengamir fungsi trigonometri dan hiperbolik. Panjang lengkung, luas permukaan bongkah kisanan dan kelengkungan. Jujukan dan siri : ujian penumpuan. Siri menumpu mutlak / bersyarat. Siri kuasa. Siri Maclaurin dan siri Taylor. Pembezaan dan kamiran bagi siri kuasa.

UMC 1022

CREATIVITY AND INNOVATION

SYNOPSIS :

This course focuses on developing a creative person who will eventually think strategically, creatively and critically. The knowledge and skills acquired throughout the course will later be applied by the students in solving problems and making decisions in the future. In this course, students will be exposed to various creativity and problem solving techniques. Some of the skills to be covered throughout the course are problem solving, techniques in creativity and techniques in innovation. Students will also be participating in exhibition and competition.

BDA 1012

ENGINEERING DRAWING

SYNOPSIS :

Introduction of engineering drawing: Equipment and material uses. Drawing standard. Lettering and lines. Dimension lines. Plane geometry. Orthographic projection view. Cross section view. Orthographic projection drawing. Cross section view. Isometric, oblique and perspective drawing. Mechanical drawing of single component. Ordinary routines and convention. Bolt, screw and nut. Tolerance, limit and assembly. Surface texture. Welding. Introduction

of drawing aided by computer software. Drawing command and two dimension drawing (2D).

BDA 1023

STATICS

SYNOPSIS :

This course introduces students to the basic principles and concepts of engineering mechanics (static) and its application in the field of engineering. Student will be taught the basic concept such as Introduction to static, static of particles, static of rigid bodies, centroids and centre of gravity, analysis of structures and friction.

**YEAR 1
SEMESTER II**

UMB 1052 EFFECTIVE COMMUNICATION

PRE REQUISITE: : UMB 1042 (TECHNICAL WRITING)

SYNOPSIS :

This course emphasises upon task- based learning approach and focuses on developing students' delivery of speech in oral interactions and presentations. Importance is given on mastery of self-directed learning, team-work, research, oral presentations, reasoning and creativity. This course also enables students to acquire knowledge and skills necessary for conducting and participating in meetings, including writing of meeting documents.

BSM 1923 ENGINEERING MATHEMATICS II

PRE-REQUISITE : BSM 1913 (ENGINEERING MATHEMATICS I)

SYNOPSIS :

First Order Differential Equations: Formation and methods of solution (separating the variables, homogeneous, linear and exact), initial value problem, applications (Newton Cooling Law, motion along the linear line and simple electric circuit). **Second Order Linear Differential Equation with Constant Coefficients:** Methods of solving: method of undetermined coefficient and method of variation of parameter, applications in mechanical motions includes free oscillations and force oscillations. **Laplace Transform:** Definition, linearity, first shift theorem, multiplying by t . Unit step

functions and Delta functions, second shift theorem. Inverse Laplace transform: Definition and properties, convolution theorem. Solve initial and boundary value problems for linear differential equations with constant coefficients which involve unit step functions, Dirac Delta functions and periodic functions. **Fourier Series:** Fourier series in interval period 2π , odd and even functions. Fourier series in interval $(-l, l)$. Half range Fourier series. **Partial Differential Equations:** Wave equations, heat equations.

BDA 1052 FLUID MECHANICS I

PRE-REQUISITE: Static

SYNOPSIS:

This course starts with an introduction to the fluid mechanics and fluid properties. Later it moves into Fluid Statics and Fluid Kinematics. Fluid Static covers a principle of fluid static, hydrostatic pressure and buoyancy. Fluid Kinematics includes the principles of continuity equation, Bernoulli and momentum equation and its applications. Finally it discusses an analysis of flow in pipes, similarity and dimensional analysis.

REFERENCE(S):

BEE 1803 TEKNOLOGI ELEKTRIK DAN ELEKTRONIK

SYNOPSIS :

Definasi asas: arus, voltan, kuasa, tenaga, arah REFERENCE(S) dan kutub-kutub, Unsur-unsur litar unggul. Hukum-hukum litar. Hukum voltan Kirchhoff dan hukum arus Kirchhoff. Kaedah menganalisis litar a.t.: analisis arus cabang, analisis arus jejaring, analisis voltan nod. Teorem-teorem litar: teorem tindihan, Millman, Thevenin dan Norton. Unsur-unsur penyimpanan tenaga: pemuat dan pengaruh. Analisis litar-litar satu fasa. Pengubah elektrik.

REFERENCE(S) :

BDA 1701 ENGINEERING LABORATORY I

PRE-REQUISITE: None

SYNOPSIS:

This course performs several experiments for Statics and Electrical Technology.

Statics: Balance of Forces, Polygon of Forces, Equilibrium of Rigid Body, Principle of Moment and Friction on a Plane.

Electrical Technology: Component Quantity and Unit, Measurement of Direct Current, Ohm's and Kirchhoff's Law, Superposition Theorem, Theorem of Thevenin and Theorem of Norton.

REFERENCE(S) :

YEAR 2

**YEAR 2
SEMESTER I**

UMA 1132 ISLAMIC STUDIES

SYNOPSIS :

This course explains about Islamic concepts which cover aqidah, syariah and akhlak. The scope of the discussion involves the Islamic principles, iman's principles and Ihsan. Focus will also be given on the basic of Islam that emphasizes on the concept of tauhid, ibadah and akhlak. This course also clarifies about the foundation of Islam (*maqasid al syariah*), current issues and the interrelation with akhlak.

REFERENCE(S) :

6. Yusuf al-Qardawi, (1993), *Ibadah Dalam Islam*, Kuala Lumpur : Pustaka Suhaba

UMA 1142 MORAL STUDIES

SYNOPSIS :

This subject explores the moral concepts, some aspects related to the morality and its importance in our daily lives, some western moral theories, moral values in great religions of the world, morality and ethics in professional careers and contemporary moral issues.

REFERENCE(S) :

1. Eow Boon Hin. 2002. *Moral Education*. Longman.

UM* 1312

FOREIGN LANGUAGE

- **UMM 1312 MANDARIN**

SYNOPSIS :

This course is offered to students focusing on the learning of the basic of mandarin. Students are exposed to the skills of listening, reading, speaking and writing with basic vocabulary, grammar and structure. Students are also provided with a lot of opportunities to practice their communication and writing skills.

BSM 2913

ENGINEERING MATHEMATICS III

PRE-REQUISITE : **BSM 1913 (ENGINEERING MATHEMATICS II)**

SYNOPSIS :

Functions of Several Variables: Domains, ranges, contour line, level curves and 3D-graphs. Partial derivatives and chain rules. Mixed derivatives. Total differentials and exact differentials. Local and absolute extreme values of functions of two variables. **Multiple Integrations:** Double integrals: Areas and volumes. Double integrals in polar coordinates. Surface areas. Triple integrals: Volumes. Triple integrals in cylindrical and spherical coordinates. Center of mass, center of gravity and inertial moments. **Vector-valued Functions:** Definition and graphs. Differentiations and integrations. Tangent vectors, normal vectors, arc length and curvature. Motion in a plane curve. Directional derivatives and gradients of functions of two variables. **Vector Calculus:** Line integrals of scalar and vector field. Independence of path and conservative vector field. Green's Theorem. Surface integrals of scalar and vector field. Gauss's Theorem and Stokes' Theorem

BTI 1022

PENGATURCARAAN KOMPUTER

SYNOPSIS :

Untuk memberi pengenalan kepada konsep pengaturcaraan melalui penggunaan bahasa paras tinggi seperti C. Sejarah dan evolusi bahasa pengaturcaraan, jenis-jenis data, dan operasi input dan output. Pengaturcaraan berstruktur dan kawalan: gelung while, gelung for, switch, if-else. Penggunaan fungsi, tatasusunan, struktur dan penuding.

BDA 2013

DYNAMICS

PRE-REQUISITE: STATICS

SYNOPSIS:

This subject is an introduction of engineering dynamics to bachelor of mechanical engineering students. The topics covered are mainly focusing in two dimensional or planar coordinate system of kinematics and kinetics of particles as well as the kinematics and kinetics of rigid bodies. Various mechanical engineering applications are discussed in the form of example problems.

REFERENCE(S):

BDA 2022 THERMODYNAMICS I

PRE-REQUISITE:

Engineering Mathematics I (BSM 1913) and Engineering Mathematics II (BSM 1923)

SYNOPSIS:

Definition and basic concepts, Properties of compressible pure substances, Heat and Work, The First Law of Thermodynamics, The Second Law of Thermodynamics, Thermodynamics Cycles, Reversibility of Entropy.

REFERENCE(S):

1. J. R. Howel and R. O. Buckins; *Fundamentals of Engineering Thermodynamics*, New York: McGraw Hill 1987.

BDA 2701 ENGINEERING LABORATORY II

PRE-REQUISITE: -

SYNOPSIS:

Fluid Mechanics:

Jet impact, Reynolds Number, Bernoulli's Theorem, Flow in Pipe, Hydrostatic Pressure and Cavitations in Pipe

Materials Science:

Introduction to Materials Science and Engineering, types of materials, atomic structure and bonding, material characteristics such as density and porosity, sampling preparation, metallographic,

heat treatment method such as quenching and normalizing, metal sample preparation and study on hardness and properties of clay.

REFERENCE(S):

1. Mott R.L., 2000, "*Applied Fluid Mechanics*", 5th Edition, International Edition, Prentice Hall.

**YEAR 2
SEMESTER II**

UMS 1122 ETHNIC RELATIONS

SYNOPSIS :

This subject focusus on the conceptual and practical of the ethnic relation in Malaysia's community. The discussions will comprise the concepts of ethnic relation and the history of plural society construction. The matter of constitution as the core of the societal life will also be covered. Discussions will also look at the relation ship between the development and the ethnicity in the aspect of economy, politics and social based on the approach of top-down and bottom-up by the government and the society.

UQ* 11 CO-CURRICULUM II**

SYNOPSIS :

Matapelajaran ini ditawarkan dalam bentuk pelbagai aktiviti pilihan untuk pelajar peringkat Sarjana Muda dan Diploma. Tiga bidang aktiviti yang ditawarkan adalah Sukan & Rekreasi, Kelab/Persatuan dan Persatuan Beruniform.

BSM 2922

ENGINEERING STATISTICS

PRE-REQUISITE : BSM 1913 (ENGINEERING MATHEMATICS I)

SYNOPSIS :

Random Variables. Probability Distributions: Binomial, Hypergeometric, Poisson and Normal distributions. Normal approximation to Binomial and Poisson. **Sampling Distribution:** Sampling distribution for mean and difference between two means, distribution for proportion. **Estimation:** point estimation and confidence intervals, confidence intervals for mean, variance and proportion. **Hypothesis Testing:** Mean for small/large sample, difference between two means and proportion for small/large sample. Variance and the ratio of variance. **Simple Linear Regression:** Graphical method, least square method. Coefficient of determination R^2 . Correlation.

BDA 2033 MECHANICS OF MACHINES

PRE-REQUISITE : DYNAMICS

SYNOPSIS :

This subject covers several topics including gear systems, balancing, power transmission, belting, friction in screws and nut, mechanism and introduction to vibration. These essential topics in machining might provide students with proficient theoretical and graphical background in dealing with machine systems. Student will learnt to apply the principle and theory of mechanics of machine to solve system's problem such as gear system, balancing and belting system in the real engineering practice

BDA 2052 CAD AND MODELING

PRE-REQUISITE :Engineering Drawing

SYNOPSIS:

Introduction to 3 dimensional (3D) drawing. Basic 3D approaches; wire frame, 3D coordinate system, 3D model point of view , user coordinate system (UCS) and world coordinate system (WCS). Isometric view and orthographic view. Construction of 3D surface modeling and solid modeling. Plotting CAD drawing.

BDA 2711 ENGINEERING LABORATORY III

PRE-REQUISITE: None

SYNOPSIS:

This course performs several experiments for Solid Mechanics and Dynamics.

Solid Mechanics I: Tensile, Torsion, shearing force, tegasan lenturan rasuk and Thin Cylinder.

Dynamics :Simple Pendulum , Projectile , Energy Conservation , Mechanism of Crank and Universal Coupling.

REFERENCE(S) :

1. Gere, J.M. and Goodno, B.J., 2009. "Mechanics of Materials", 7th Edition, Cengage Learning.

4. Soutas-Little, R.W., Inman, D. J. and Balint, D.S., 2008. "Engineering Mechanics : Dynamics", Thomson Learning

BDA 2721

ENGINEERING LABORATORY IV

SYNOPSIS:

Thermodynamics I:

1st Law of Thermodynamics, Separating and Throttling Calorimeter, Temperature and Pressure Measurement, Marcet Boiler, and Boyle's Law.

Mechanics of Machine:

Undamped Beam Oscillation, Balancing of Rotating Mass, Computerized Gear Systems, Bevel Gear, and Belt Friction.

REFERENCE(S):

1. Mohd Kamal Ariffin, Farid Nasir Ani, Zulkarnain Abdul Latif, 2002 "Termodinamik Asas", Penerbit UTM.

YEAR 3

**YEAR 3
SEMESTER I**

BSM 3913 ENGINEERING MATHEMATICS IV

PRASYARAT: BSM 1913 (ENGINEERING MATHEMATICS I)

SYNOPSIS :

Penyelesaian persamaan tak linear: kaedah pembahagian duasama, sekan dan lelaran Newton Raphson. Penyelesaian sistem persamaan linear: kaedah penghapusan Gauss, pemfaktoran LU, Thomas, lelaran Gauss-Siedal. Interpolasi dan penghampiran: kaedah Newton dengan beza berbahagi, Lagrange, kubik splin. Pembezaan berangka: penggunaan jadual beza terhingga dan polinomial interpolasi. Kamiran berangka: kaedah Simpson dan kuadratur Gauss. Nilai Eigen: kaedah kuasa. Persamaan pembezaan biasa. Penyelesaian masalah nilai awal: kaedah siri Taylor, Euler, Huen, Runge-Kutta dan kaedah multilangkah (kaedah peramal-pembetul). Penyelesaian masalah nilai sempadan: kaedah beza hingga. Persamaan pembezaan separa: kaedah tak tersirat dan tersirat menggunakan kaedah beza terhingga. Kaedah unsur terhingga: pendekatan am, penggunaan unsur terhingga pada matra satu.

6. Sullivan et al, 2006. "*Engineering Economy*", 13th Edition, Prentice Hall Inc.

BDA 3023 FLUID MECHANICS II

PRE-REQUISITE: FLUID MECHANICS I

SYNOPSIS:

This course continues from Fluid Mechanics I. The course covers viscous flow in pipes, differential equation for fluid flow with emphasis on flow potential, boundary layer theory, introduction to turbo machinery and introduction to compressible fluid flow.

REFERENCE(S):

1. Bruce R. Munson, Donald F. Young and Theodore H. Okiishi, 1998, "*Fundamental of Fluid Mechanics*", 3rd Edition, John Wiley & Sons.
2. J. F. Douglas, J. M. Gasierrek and J. A. Smallfield, "*Fluid Mechanics*", 3rd Edition: Longman Singapore Publishers (Pte) Ltd.

3. Merie C. Porter and David C. Wiggert, 1997, "*Mechanics of Fluid*", 2nd Edition, Prentice Hall.
4. Robert L. Mott, 2000, "*Applied Fluid Mechanics*", 5th Edition (International Edition), Prentice Hall.

BDA 3033 MECHANICS OF MATERIAL II

PRE-REQUISITE: MECHANICS OF MATERIAL 1

SYNOPSIS :

The subject mechanics of material II involves analytical methods for determining stress, strain and stability of various engineering components and structures. A thorough understanding of the basic principles is useful to mechanical engineers. The syllabus is organized in six chapters. Chapter 1 deals with plane-strain transformation system. Methods for determining the principal strains analytically and graphically have been considered in this chapter. Chapter 2 discusses the determination of slope and deflection for various type of beams both statically determinate and statically indeterminate beams. Buckling analysis of columns and struts using Euler's and Rankine's theory are studied in chapter 3. Chapter 4 provides a discussion and application of strain energy methods for computing a problems related to deflection, torsion and axial load including the application of Castigliano's theorem. Chapter 5 explore stress analysis of thick cylindrical vessels subjected to internal and external pressures. Lastly, in chapter 6 deals with application of various theories of failure to predict the safety of componets and engineering structures.

BDA 3043

THERMODYNAMICS II

PRE-REQUISITE: THERMODYNAMICS I

SYNOPSIS :

The course will give emphasize to the application of thermodynamics laws in engineering applications. The students will be exposed to the working principle of power plants, machines and engines that operate based on thermodynamics system. The student will have the ability to describe indicated diagrams, analyze the thermodynamics cycles, and compare between the theories and actual applications. Thermodynamics systems that are going to be discussed includes steam and gas power plants, heat pump and refrigeration system, reciprocating compressor, internal combustion engines and non reactive mixtures, and cooling tower system.

**YEAR 3
SEMESTER II**

UMS 1113

**NATIONHOOD AND CURRENT
DEVELOPMENT OF MALAYSIA**

SYNOPSIS :

This subject discusses the basic concept, formation and development of Malaysia. It includes the Malay Sultanate of Malacca Empire, imperialism and colonialism, patriotism and nasionalisme and independence and formation of Malaysia. Besides that, it also mentioned the constitution and government of Malaysia system, and national development policy. Other than that, role and responsibilities of citizens are enforce upon besides the success and challenges of Malaysia.

BDA 3083 MECHANICAL ENGINEERING DESIGN I

PRE-REQUISITE:

Statics, Dynamics, Solid Mechanics II, Material Selection

SYNOPSIS:

Introduction to engineering design process, its role in the technology development and its impacts, the engineering fundamentals and its applications, static and fatigue failure of theories, analysis and design considerations of permanent and non permanent joining, springs, bearings, shafts and gears.

REFERENCE(S):

1. Shigley, J. E., Mischke, C. R. & Budynas, R. G., (2004), "Mechanical Engineering Design", Seventh Edition, McGraw Hill

**BDA 2811 MECHANICAL ENGINEERING PRACTICES IV
(OPTION III)**

**PRE-REQUISITE: MECHANICAL ENGINEERING PRACTICES III
(OPTION III)**

SYNOPSIS :

Programmable automated system, Circuit system and PLC installation, Basic technology of industrial robotic, robot operation and automated simulation.

REFERENCE(S):

1. S. Brian Morris (2000), Programmable Logic Control, Prentice-Hall Inc.
2. S. R. Majumdar (1995), Pneumatic Systems, Tata McGraw-Hill.
3. Lung-Wen Tsai (1999), Robot Analysis, John Wiley & Sons.
4. James A. Rehg, & Eric J. Black (2007), Programmable logic controllers, Prentice-Hall Inc.

**BDA 2811 ENGINEERING MECHANICAL PRACTICE IV
(OPTION 4)**

PRE-REQUISITE: ENGINEERING PRACTICE III (OPTION 4)

SYNOPSIS:

Laboratory Safety and Regulation, Preparation of POP Mould for Ceramic Casting Process, Production of Ceramic Product Through Casting, Production of Ceramic Sample Through Powder Processing, Production of Ceramic Product and Glazing, Screen Printing, Glass Formation.

REFERENCE(S):

1. Callister, W.D. Jr, 2007, "Materials Science and Engineering: An Introduction", 7th Edition, John Wiley.

YEAR 4

**YEAR 4
SEMESTER I**

BDA 4012 INDUSTRIAL ENGINEERING

SYNOPSIS :

Introduction of industrial engineering, facilities planning, basic concepts of statistics, method study, work measurement, ergonomics, production planning and control, quality control.

REFERENCE(S) :

1. Stevenson, W.J., 2007, "Operations Management", 9th Edition, McGraw Hill.
2. Heizer, J. and Render, B., 2006, "Principles of Operations Management", 8th Edition, Prentice Hall.

4. Krajewski, L.J., 2002, "Operations Management: Strategy and Analysis", 6th Edition, Prentice Hall.

BDA 4902 BACHELOR'S DEGREE PROJECT I

PRE-REQUISITE: Mechanics of Machines, Solid Mechanics II, Fluid Mechanics II, Thermodynamics II, Engineering Material Selection and Engineering Statistics

SYNOPSIS:

The Bachelor's Degree Project (PSM) is a systematic academic training which utilizes the use of engineering knowledge, skills, concepts and problem solving techniques. A project may involve: (1) study of a phenomenon/process/system, (2) design/construction of components/products, (3) software development, or (4) case study. A project could be industrial-based or lab-based. The Bachelor's Degree Project is divided into two sections namely PSM I and PSM II with the former being the PRE-REQUISITE for the latter and each carried out consecutively in two separate semesters.

REFERENCE(S):

2. Jawatankuasa Kecil PSM FKMP (2008), *Buku Log Projek Sarjana Muda*, UTHM, Batu Pahat.
3. *Other academic REFERENCE(S) such as scientific journals, conference proceedings, text books, patents, standards, akademik articles, legal documents, scientific magazines, formal interviews etc.*

BDA 4023 MECHANICAL ENGINEERING DESIGN II

PRE-REQUISITE: Mechanical Engineering Design I, Fluid Mechanics II, Thermodynamics II

SYNOPSIS:

The subject discuss about common engineering design methods begin from identification of needs to the design embodiment. Ergonomic and economic considerations are included as well as engineering design tools such as finite element analysis and kinematic analysis software application. Case studies in different applications will be also discussed.

REFERENCE(S):

1. Pahl, G., & Beitz, W. (2007). "Engineering Design: A Systematic Approach 3rd Edition", Berlin: Springer Verlag.

BDA 4033

FINITE ELEMENT METHOD

SYNOPSIS:

Fundamental concepts, solution methods, gaussian elimination, one-dimensional problems, trusses, two dimensional problems using constant strain triangles, axisymmetric solids subjected to axisymmetric loading, two-dimensional isoparametric elements and numerical integration, beam and frames, three-dimensional problems in stress analysis, scalar field problems, computational software applications.

REFERENCE(S) :

BDC 4013

VIBRATION AND NOISE

PRE-REQUISITE SUBJECTS : MECHANICS OF MACHINE

SYNOPSIS :

Fundamental of Vibrations, Second Degree of Freedom Systems, Multiple Degree of Freedom Systems, Determination of Natural Frequency and Mode Shapes, Continuous Systems, Vibration Control, Vibration Unit and Vibration Chart Application, Vibration on Handheld, Sound Behaviour, Noise Assessment, Noise Measurement and Control, Vibration Intensity Identification, Damage Detection

REFERENCE(S) :

BD* 43**

ELECTIVE 1

ELECTIVE SUBJECTS

MATERIAL ELECTIVES

BDB 4013 MATERIALS SCIENCE THERMODYNAMIC

PRE-REQUISITE: ENGINEERING MATERIALS SELECTION, THERMODYNAMIC 1

SYNOPSIS:

Introduction Thermodynamic Concept and Introduction to the Application of Materials Thermodynamic System, Structure of Thermodynamic, General Strategy Correlation of Thermodynamic system, Basic Laws of Thermodynamic, Unary System, Phase Diagrams, Ternary Phase Diagram.

REFERENCE(S):

1. Robert T. DeHoff, 2007, "Thermodynamics in Materials Science: An Introduction", 7th Edition, John Wiley.
2. David V.Ragone, 1995, "Thermodynamics of Materials", Volume 1, Wiley.
3. Gaskell D.R., 2003, "Introduction to the Thermodynamic of Materials", 4th edition, Taylor & Francais.
4. Ragone D.V., 1994, "Thermodynamics of Materials", Volume I & II, Wiley.

BDB 4023 MATERIALS TESTING

PRE-REQUISITE: Engineering Materials Selection

SYNOPSIS:

Introduction To Materials Testing, Mechanical Tests, Non-Destructive Tests, Microscopy, Spectroscopy, Thermal Analysis.

REFERENCE(S):

1. Paul E. Mix, 2005, "Introduction to Nondestructive testing training guide", 2nd edition, John Wiley and Sons.
2. T.Jayakumar, Baldev Raj, M. Thavasimuthu, 2000, "Practical Non Destructive Testing", Woodhead Publishing Limited.

4. Jenkins.R; Robert.S.L, 1996, "Introduction to X- ray powder Diffractometry", John wiley.

BDB 4033 MECHANICAL METALLURGY

PRE-REQUISITE: Engineering Materials Selection

SYNOPSIS:

Introduction to Plasticity and Elasticity Theories, Plastic and Elastic Deformation, Dislocation Theory and Hardening Mechanism, Mechanical Work Process.

REFERENCE(S):

1. Ralph, Stephens, Fatemi A., Stephens R.S., Fuchs H.O., 2001, "Metal Fatigue in Engineering ", 2nd Edition, John Willey & Sons Ins.
2. Budinski K. G dan Budinski M. K, 1999, "Engineering Materials, Properties and Selection", 6th Edition, Prentice Hall.
3. Dieter G.E., 1988, "Mechanical Metallurgy", 3rd Edition, McGraw-Hill.
4. R.W. Hertzberg, "Deformation and fracture mechanics of Engineering Materials", 4th Edition, Wiley.

BDB 4043 CORROSION AND PROTECTION

PRE-REQUISITE: Engineering Materials Selection

SYNOPSIS:

Principal and Mechanism of Corrosion, Types of Corrosion, Measurement Method and Corrosion Analysis, Atmosphere and High Temperature Corrosion, Prevention Method and Protection, Corrosive Environment and Materials Selection Method for Environmetal Exposure.

REFERENCE(S):

1. Edward Ghali, 2007, "Corrosion Prevention and Protection: practical solutions", New York, John Wiley.

2. Gerhard Kreysa and Michael Schutze (ed), 2006, "Corrosion Handbook: Corrosive Agents and Their Interaction with Materials: Volume 5: Carbonic Acid, Chlorine Dioxide, Seawater", John Wiley.
3. Robert Baboian, 2005, "Corrosion Tests and Standards: Application and Interpretation", ASTM International.
4. M.G. Fontana., 1992, "Corrosion Engineering", 3rd Edition, McGraw-Hill.

BDB 4053

APPLIED METALLURGY

PRE-REQUISITE: Engineering Materials Selection

SYNOPSIS:

Defination and Characterisation of Casting Process, Types of Casting Process and Characterizations Identification, Solidification upon Casting, Casting Defects, Powder Characterisation, Production of Metal Powder, Metal Powder Compaction, Mechanical Properties and Powder Metalurgy Application.

REFERENCE(S):

1. B.J. Moniz (2003), "Metallurgy", American Technical Publisher, Inc.
2. C.W Ammen, (2000), "Metalcasting", Mc-Graw Hill
3. The Material Information Soceity, (2003), "ASM Handbook Vol. 7 – Powder Metal Technology and Application", ASM International
4. James P.S., (1999), "The Science and Design of Engineering Materials", 2nd Edition, McGraw-Hill.

BDB 4063

POLYMER AND CERAMIC

PRE-REQUISITE: Engineering Materials Selection

SYNOPSIS:

Introduction to Non-Metallic Materials, Processing of Non-Metallic Materials, Ceramic Processing, Polymer Processing

REFERENCE(S):

1. Budinski K.G & Budinski M.K., 2002, "Engineering Materials: Properties and Selection", Prentice Hall.
2. German R. M., 1996, "Sintering Theory and Practice", Wiley-Interscience.
3. Jones and Tinker' (2000); 'Blends of Natural Rubber'; RapraTechnology Ltd.
4. Brostow W.' (2000); 'Polymer Characterization, 7th International Conferences on Polymer Characterization', Wiley-VCH.

BDB 4073 COMPOSITE

PRE-REQUISITE: Engineering Materials Selection

SYNOPSIS

Introduction to Composite Material, Reinforcements and Matrices, Properties of Composite Materials, Processing and Fabrication in Material Composite, Application for Material Composite.

REFERENCE(S):

1. Schwartz, M.M., 1997, "Composite Materials Vol 1: Properties, Nondestructive Testing and Repair", Prentice Hall.
2. Schwartz M.M., 1997, "Composite Materials Vol 2: Processing, Fabrication and Application", Prentice Hall.
3. Gibson R., 2000, "Principles of Composite Materials Mechanics", McGraw-Hill.
4. Jones R. M., 1999, "Mechanics of Composite Materials", 2nd edition, Taylor & Francis.

BDB 4083 ADVANCED MATERIALS

PRE-REQUISITE: Engineering Materials Selection

SYNOPSIS

Smart Materials and Functional Materials, Ultra lightweight Material, Bio Material, Material with nano structure, Coating and thin film.

REFERENCE(S):

1. Srinivasan A.V. & McFarland D. M., 2001, "Smart Structures Analysis and Design", Cambridge University Press.
2. Osaka T. & Datta M., 2000, "Energy Storage Systems for Electronics", Gordon and Breach Science Publishers.

ELECTIVE GENERAL MECHANICAL

BDC 4023 CONTROL SYSTEM DESIGN

PRE-REQUISITE: Control Engineering

SYNOPSIS :

This course introduces students to the theory and practice of control system design. Students will learn how to design a control system using root locus technique and pole placement technique. They will also learn the principle of controllability, observability in control system and how to design the observer. System modeling and linearization of non-linear system will be learnt next. Finally, the basic principle of digital control system design will be exposed to the student.

REFERENCE(S) :

1. Ogata K., 2002, Fourth Edition, "Modern Control Engineering", Prentice Hall, New Jersey.
2. J. Dorf, 2004, "Modern Control Engineering", Addison Wesley Publishing.
3. Norman S. Nise, 2004, Fourth.Edition, "Control System Engineering", The Benjamin Cummings Publishing Co. Inc.
4. William J.Palm III, 2005, International Edition, "Introduction to Matlab 7 for Engineers", McGraw.Hill.

BDC 4033 STRESS ANALYSIS

PRE-REQUISITE: SOLID MECHANICS II

SYNOPSIS :

This course starts with introduction to stress, strain and stress-strain relationships. Then, the strain measurement methods and related instrumentation will be introduced. It moves into stress analysis by using photoelasticity method at the end of this course.

REFERENCE(S) :

1. W.C.Young, R.Budynas (2002). "Roark's Formulas for Stress and Strain".7th Edition. McGraw-Hill.
2. A.P.Boresi and R.J.Schmidt (2003). "Advanced Mechanics of Materials".6th Edition. New York: John Wiley.

3. R. Budynas (1999). "*Advanced Strength and Applied Stress Analysis*". 2nd Edition, McGraw-Hill.
4. J. W, Dally. W.F, Riley (2005), *Experimental Stress Analysis*, Fourth Edition, Knoxville, Tennessee, College House Enterprises, L.L.C.
5. A. Kuska, G. Robertson (1974). "*Photoelastic Stress Analysis*", John Wiley.

BDC 4043 KINEMATICS AND MECHANISMS

PRE-REQUISITE: DYNAMICS

SYNOPSIS:

This course introduces the concepts of kinematics and mechanisms to bachelor of mechanical engineering students. An introduction of motion analysis in terms of the particle position, velocity and acceleration will be thoroughly discussed. Example problems are presented in relevant mechanical applications to improve the comprehension in real practical mechanical engineering field. The discussion of mechanisms of dynamical systems covers the general introduction to dynamics mechanisms, cam design, gears and gear trains. On the completion of the subject, students will be able to carry out standard kinematics analysis of a system particularly for the displacement, velocity and acceleration. Students will also be able to synthesise of combination of various mechanism combinations. A skill of presenting a team work conclusion will be gained through a group project assignment.

REFERENCE(S):

4. Kenneth J. Waldron & Gary L. Kinzel, 2004. Kinematics, Dynamics, and Design of Machinery, 2nd Edition, John Wiley & Sons.

BDC 4053 FATIGUE AND FAILURE MECHANISM

PRE-REQUISITE : Solid Mechanics II

SYNOPSIS:

Introduction, Linear Elastic Failure Mechanism, Non-linear Failure Mechanism, Fatigue, Fatigue Crack Propagation, Microscopic Failure Mechanisms

REFERENCE(S) :

1. Barsom, J.M. dan Rolfe, S.T., 1999. *“Fracture & Fatigue Control in Structures, Application of Fracture Mechanics”*, Prentice- Hall

4. Geoffrey Boothroyd, Peter Dewhurst And Winston Knight, 2007, *"Product Design For Manufacture And Assembly"*, 3rd Ed., Marcel Dekker Inc.

BDD 4023 COMPUTER AIDED DESIGN AND MANUFACTURING

PRE-REQUISITE: CAD and Modeling, Mechanical Engineering Practices II and III

SYNOPSIS :

Introduction to CAD/CAM System, Geometric Modelling System, Standards for System Communication, Data Storage, Integration of CAD/CAM, Numerical Control, Data Communication and Local Area Network

REFERENCE(S) :

1. T.C.Chang, R.A. Wysk, H.P. Wang, 2006. *"Computer Aided Manufacturing"*, 3rd Edition, Pearson Education International.
2. P. N. Rao, 2002, *"CAD/CAM Principles and Applications"*. Tata McGraw-Hill Co. Ltd.

4. Kunwoo Lee, 1999. "Principles Of CAD/CAM/CAE Systems", Addison Wesley Logman Inc.

BDD 4033 RAPID PRODUCT DEVELOPMENT AND MANUFACTURING

PRE REQUISITE: : CAD and MODELING

SYNOPSIS :

Introduction to Rapid Prototyping, Rapid Prototyping Process, Prototype System in liquid, Solid and Powder Based, Rapid Prototyping Format Data, Learning Case and Application on Manufacturing, Casting Process, Concurrent Engineering using Rapid Prototyping, Assessment.

REFERENCE(S) :

1. G. Andreas, 2003. "Rapid Prototyping", Hanser Gardner Publication Inc.
2. Kenneth G. Cooper, 2001. "Rapid Prototyping Technology Selection And Application", Marcel Dekker Inc.

4. A. Gebhardt, (2003), "Rapid Prototyping". Hanser Gardner Publications.

BDD 4043 RAPID MANUFACTURING

PRE REQUISITE: : BDA 2052(CAD and MODELING), BDA 3052 (MANUFACTURING TECHNOLOGY)

SYNOPSIS :

Direct Metal Laser Sintering (DMLS), Layer-By-Layer Sintering Of Metal Powder, Functional Prototypes, Rapid Prototyping, Rapid Tooling

REFERENCE(S) :

1. Noorani, Rafiq, (2006). *“Rapid Prototyping”*. John Wiley and Sons Inc.
2. A. Gebhardt, (2003). *“Rapid Prototyping”*. Hanser Gardner Publications.

4. *Implementing Concurrent Engineering In Small Companies*, Susan Carlson Skalak, Marcel Dekker Inc, 2002

BDD 4063 METAL CASTING

PRE-REQUISITE : Manufacturing Technology , Mechanical Practice Engineering II I

SYNOPSIS :

Types of casting process, mould fabrication, sand mould, tools and equipments for molding, tools for melting process, casting practice, core design, pattern design , casting inspection, casting defects, and design analysis.

REFERENCE(S) :

1. Zainal Abidin Ahmad, "*Proses Pembuatan*", Edisi Pertama, Universiti Teknologi Malaysia, 1999.

3. Edward M. Trent and Paul K. Wright, "*Metal Cutting*", Fourth Edition, Butterworth Heinemann, 2000.
4. Mikell P. Groover, "*Fundamentals of Modern Manufacturing*", Third Edition, McGraw Hill, 2007.

BDD 4083 MANUFACTURING CONTROL TECHNOLOGY

PRE-REQUISITE : CONTROL ENGINEERING

SYNOPSIS :

Introduction and exposure to control theory and concept, modeling, mechanism and production in manufacturing operation's systems which could provide related knowledge and experience in planning, scheduling and time domain control with the integration between manufacturing equipments and computer programming.

REFERENCE(S) :

1. Richard Zurawski, (2006), *Integration technologies for industrial automated systems*, Industrial Information Technologies Series 3, Boca Raton, FL: Taylor and Francis.

BDE 4033 TURBO MACHINE

SYNOPSIS:

Basic thermodynamic and fluid mechanic, heat transfer in turbo machine. Principle of operation, types, operational characteristics and aspect design for turbin hydraulic, steam turbin, gas turbine, pump and compressor. Turbomachine Dimension analysis. Heat exchanger and combustion chamber study. Various application in of transport sector (aero engines, gas turbines for ship and train propulsion) and the energy sector (steam and gas turbines for power generation) as industry forwards.

REFERENCE(S):

1. Karassik IJ, 2000, "Pump Handbook", 3rd Edition, Mc Graw Hill.

4. Merle C. Potter and David C. Wiggert, 1997, "Mechanics of Fluids", 2nd Edition, Prentice Hall.

BDE 4043 COMPUTATIONAL FLUID DYNAMICS

PRE-REQUISITE: Fluid Mechanics II

SYNOPSIS:

The CFD course content include introduction and history of CFD, the governing fluid flow equations, the concept of turbulence and its modeling, numerical methods in CFD, errors and uncertainties in CFD, and applications of CFD.

REFERENCE(S):

1. Versteeg H. K. and Malalasekera W., (2007), *An Introduction To Computational Fluid Dynamics: The Finite Volume Method, 2nd Edition*, Essex, Longman Scientific & Technical.

5. Munson, B. R., Young, D. F., Okiishi, T.H., (2002), *Fundamentals of Fluid Mechanics 4th Edition*, USA, John Wiley & Sons, Inc.

BDE 4053

FLUID POWER

PRE-REQUISITE: Fluid Mechanics II, Control Engineering

SYNOPSIS:

Introduction to fluid power, hydraulic and pneumatic system components, hydraulic circuit design, pneumatic circuit and application, pollution source, effect and control of hydraulic systems

REFERENCE(S):

1. Anthony Esposito, 2003, *“Fluid Power with Applications”*, 6th Edition, Prentice Hall.
2. Anton H. Hehn. , 1997, *“Fluid Power Handbook. Vol.1: System Design, Maintenance and Troubleshooting”*, Gulf Publishing Company.

4. James A. Sullivan, 1989, *“Fluid Power: Theory and Applications”*, 3rd Edition, A Reston.

BDE 4063

INTERNAL COMBUSTION ENGINE

PRE-REQUISITE: Thermodynamics I and Thermodynamics II

SYNOPSIS:

This course discusses the operation and designs of various types of internal combustion engines (ICE), using the application of applied thermodynamics, parameters that influence the engine performance,

engine testing and also discussion on the effects of ICE to the environment; with focus on ICE for automotive applications. Topics in this course include: Introduction on ICE, Engine Cycles, Spark Ignition Engines, Compression Ignition Engines, Conventional and Alternative Fuels for ICE, Emissions, and ICE testing.

REFERENCE(S):

1. Heywood, J. B., (1988) *Internal Combustion Engine Fundamentals*, Singapore, McGraw Hill Book Co.
2. Pulkrabek, W. W. (2003) *Engineering Fundamentals of the Internal Combustion Engine*, Prentice Hall

4. Stone, R. (1993) *Introduction to Internal Combustion Engines*, SAE International

BDE 4073 MAINTENANCE AND SAFETY ENGINEERING

PRE-REQUISITE: Thermodynamics I, Thermodynamics II and Statistics

SYNOPSIS:

Topics discussed in this course cover basic safety, procedures to reduce accident rates and also hazard identifications in industrial plants.

REFERENCE(S):

1. John Ridley and John Channing; *Safety at work*, Oxford: Elsevier, 2008.
2. Roger L. Brauer; *Safety and health for engineers*, Hoboken, NJ: John Wiley, 2006.

BDE 4083 AERODYNAMICS

PRE-REQUISITE: Fluid Mechanics II

SYNOPSIS:

Introduction to aerodynamics, general principle and equations of aerodynamic, vortex and lift, flow around the cylinder, boundary layer, Reynolds number, Kutta-Jackowki theorem, lift on an aerofoil, friction analysis, subsonic and supersonic flow, Mach number , wind tunnel.

REFERENCE(S):

1. Anderson J, 2006, *Fundamental of Aerodynamic*, Mc Graw Hill.
2. J.J Bertin, M.L Smith, 1995, *Aerodynamic For Engineers*, Prentice Hall.
3. L.J Clancy, 1994, *Aerodynamics*, Pitman.
4. Kuethe, 1992, *Foundations of Aerodynamics*, Willey.

BDE 4093 THERMAL ENVIRONMENTAL DESIGNS

PRE-REQUISITE: Thermodynamics I and Thermodynamics II

SYNOPSIS:

Historical background, Thermodynamics theories, Heat and energy transfers and changes

REFERENCE(S):

1. McQuiston and Parker, Heating, 1998, "*Ventilation and Air Conditioning Analysis and Design*", 3rd Edition, Wile.
2. Edward G Pita, 2000, "*Air Conditioning Principles and System: An Energy Approach*", 4th Edition, John Wiley.
3. Jan F. Kreider and Ari Rabl, 1987, "*Heating and Cooling of Buidings: Design For Efficiency*", McGraw Hill.
4. ASHRAE Handbooks Volume 1,2,3 & 4, American Society of Heating, Refrigeration and Air Conditioning Engineers.

TEXTILE ELECTIVES

BDF 4013 TEXTILE MATERIAL SCIENCE

PRE-REQUISITE: MATERIAL SCIENCE

SYNOPSIS:

This course is prepared for student to learn about natural fibers, blended fibers, synthetic fibers, mechanical and physical properties of fibers, the effect of moisture and temperature on fibers and fibers identification.

REFERENCE(S):

Sara J. Kadolph, 2007, Textiles, Pearson Education
B. Wulforth, 2006, Textile Technology, Hanser Gardner Publication
B. C Goshwani, 2004, Textile Sizing, Marcel Dekker
Fung. W, 2001, Textiles in Automotive Engineering, Cambridge
Technomic

BDF 4023 YARN MANUFACTURING TECHNOLOGY

SYNOPSIS:

Fiber Properties, Fiber Morphology, Physical Of Fiber, Chemical Structure Of Natural Fiber, Blended Fiber And Synthetic Fiber, Staple Yarn Manufacturing, Synthetic Yarn Texturing And Blended Yarns.

REFERENCE(S):

1. Sara, J., 2007, Textiles 10th Edition. NJ: Pearson Education, Upper Saddle River.
2. Hearle J.W.S, 2003, Yarn Texturing Technology, Woodhead Publishing
3. B. Wulforth, 2006, Textile Technology, Hanser Gardner Publication.
4. B. C Goshwani, 2004, Textile Sizing, Marcel Dekker.

BDF 4033 FABRIC MANUFACTURING TECHNOLOGY

PRE-REQUISITES : YARN MANUFACTURING TECHNOLOGY

SYNOPSIS:

Weft Knitting and Warp Knitting System, Weft Knitting and Warp Knitting Elements, Knitted Fabric Structure, Preparation for Weaving Yarn, Woven Fabric Design and Structure, Weaving Operations.

REFERENCE(S):

1. Sara, J., (2007). *Textiles 10th Edition*. NJ: Pearson Education, Upper Saddle River.
2. Kim, J-O., et al. (2006). *The Textile and Apparel Industry in Developing Countries*. Woodhead Publishing, Cambridge.
3. Wulforth, B., et al. (2006). *Textile Technology*. OH: Hanser Gardner Publications, Cincinnati.
4. Slater, K., (2003). *Textiles and the Environment*. Woodhead Publishing, London.

BDF 4043 WEAVING ENGINEERING

SYNOPSIS:

Weaving Industry, Yarn Preparation for Weaving Process, Primary Weaving Construction, Secondary Weaving Construction, Woven Fabric Properties, Types of Woven Fabric.

REFERENCE(S):

1. Kadolph, S.J., (2007). *Textiles*. Pearson Education.
2. Wulforth, B., (2006). *Textile Technology*. Hanser Gardner Publication.
3. Goshwani, B.C., (2004). *Textile Sizing*. Marcel Dekker.
4. Kim, J.O., (2006). *The Textile and Apparel Industry in Developing Countries*. Cambridge Woodhead Publishing.

BDF 4053

DYEING AND TEXTILE FINISHING

**PRE-REQUISITES: FABRIC MANUFACTURING TECHNOLOGY,
YARN MANUFACTURING TECHNOLOGY**

SYNOPSIS:

Bleaching Preparation, Singeing, Scouring And Dyeing, Desizing, Mercerization, Finishing.

REFERENCE(S):

1. Kim. J.O, 2006, The Textile and Apparel Industry In Developing Countries, Cambridge Woodhead Publishing.
2. Richard A.S, 2005, Textiles for Protection, CRC Press.
3. Leslie W.C.M, 2003, Textile Printing, Society of Dyers and Colourist.
4. C Goshwani, 2004, Textile Sizing, Marcel Dekker.

BDF 4063

TEXTILE MATERIAL TESTING

SYNOPSIS:

Quality and Standard Specification, Standard Method of Testing, Sampling and Statistic, Testing of Fiber, Testing of Yarn, Testing of Fabric.

REFERENCE(S):

1. Sara, J., (2007). *Textiles 10th Edition*. NJ: Pearson Education, Upper Saddle River.
2. Wulforth, B., et al. (2006). *Textile Technology*. OH: Hanser Gardner Publications, Cincinnati.
3. Saville, B.P., (1999). *Physical Testing of Textiles*. CRC Press.
4. Collier, B.J., and Epps, H.H., (1999). *Textile Testing and Analysis*. Merrill, New Jersey.

PACKAGING ELECTIVES

BDG 4013 PRINCIPLES OF PACKAGING ENGINEERING

SYNOPSIS:

Introduction. Functions and basic materials of packaging. Basic conceptual for packaging and package system. Basic element of physical distribution. Characterisation and differentiation of product sensitivity. Selection and performance of package system. Packaging as marketing tools. Packaging and package graphic design.

REFERENCE(S) :

1. Davis, G., 1995, "*Packaging Converting Machinery Components*", Packaging Machinery Manufacturing, USA
2. Eldrel, E., 1993, "*Packaging Printing*", Jelmar Publishing.
3. Hanlon, J., 1992, "*Handbook of Packaging Engineering*", Technomic Publishing, New York.
4. C. Glenn Davis., 1990, "*Introduction to Packaging Machinery*", Packaging Machinery Manufacturers Institute, USA.

BDG 4023 PACKAGING EQUIPMENT AND OPERATION

PRE-REQUISITE : Control Engineering, Industrial Engineering, Manufacturing Technology.

SYNOPSIS :

Operation and elements of packaging machinery. Packaging system base on pneumatics and hydraulics. Printing principles.

REFERENCE(S) :

1. Brody, A.L and Marsh, 1997, "*The Wiley Encyclopedia of Packaging Technology*", J. Wiley & Sons, Inc.
2. C. Glenn Davis., 1995, "*Introduction to Packaging Machinery*", Packaging Machinery Manufacturers Association. U. S. A.
3. Eldrel, E., 1993, "*Packaging Printing*". Jelmar Publishing.
4. Hanlon, J., 1992, "*Handbook of Packaging Engineering*", Technomic Publishing.

BDG 4033 PACKAGING SYSTEM I

PRE-REQUISITE : Material Science, Material Engineering Selection.

SYNOPSIS :

Packaging Material characteristic and test. Performance and test for flexible and rigid container. Basic elements for package specification. Manufacturing, production, characteristic, performance, design, test and specification of paper base package material.

REFERENCE(S) :

1. Brody, A.L and Marsh.,1997, "*The Wiley Encyclopedia of Packaging Technology*", J. Wiley & Sons, Inc
2. Eldrel, E., 1993, "*Packaging Printing*", Jelmar Publishing
3. Hanlon, J., 1992, "*Handbook of Packaging Engineering*", Technomic Publishing, New York
4. Bakker, M., 1986, "*Encyclopedia of Packaging Technology*", J. Wiley & Sons, Inc

BDG 4043 PACKAGING SYSTEM II

PRE-REQUISITE : Material Science, Material Engineering Selection.

SYNOPSIS :

Packaging Material characteristic and test. Performance and test for flexible and rigid container. Basic elements for package specification. Manufacturing, production, characteristic, performance, design, test and specification of plastic, glass and metal base package materials.

REFERENCE(S) :

1. Brody, A.L and Marsh.,1997, "*The Wiley Encyclopedia of Packaging Technology*", J. Wiley & Sons, Inc
2. Eldrel, E., 1993, "*Packaging Printing*", Jelmar Publishing
3. Hanlon, J., 1992, "*Handbook of Packaging Engineering*", Technomic Publishing, New York
4. Bakker, M., 1986, "*Encyclopedia of Packaging Technology*", J. Wiley & Sons, Inc

BDG 4053 PACKAGING DEVELOPMENT SYSTEM

PRE-REQUISITE : Principles of Packaging, Packaging Equipment and Operation, Packaging System I and Packaging System II,

SYNOPSIS :

Packaging development system concept. Development needs, design, cost and economy. Evolution. National packaging standards and regulations.

REFERENCE(S) :

1. Ulrich, K., 2000, *"Product Design and Development"*, Mc Graw-Hill
2. Hanlon, J., *Handbook of Packaging Engineering*, Technomic Publishing, 1992
3. Paine, F. A., *The Packaging User's Handbook*, Backie and Son Ltd, 1991
4. Leornad, Edmund.,1990, *"Packaging Specification Purchasing and Quality Control"* Marcel Dekker

BDG 4063 PACKAGING DYNAMICS

PRE-REQUISITE : Machine Mechanics, Dynamics and Control Engineering.

SYNOPSIS :

Acceleration theory, vibration, damping, spring and shock. Product failure. Cushioning characteristics and design. Evaluation of cushioning system performance. Free fall / drop test, shock and vibration test.

REFERENCE(S) :

1. Brody, A.L and Marsh.,1997, *"The Wiley Encyclopedia of Packaging Technology"*, J. Wiley & Sons, Inc
2. Hanlon, J.,1992, *"Handbook of Packaging Engineering"*, Technomic Publishing
3. Paine, F. A., 1991, *"The Packaging User's Handbook"*, Backie and Son Ltd

4. Richard K. Brandenburg & Julian June-Ling Lee.,1985,
"Fundamentals of packaging Dynamics", School of Packaging,
Michigan State University, MTS System Corporation

**YEAR 4
SEMESTER II**

BDA 4042 MANAGEMENT AND PROFESIONAL ETHIC

SYNOPSIS :

Introduction and exposure of the professional ethics, philosophy and theory of ethics, values in professional ethics, responsibility of servicing, obligation to clients and third party, obligation of profession, professionals rights, observation of behavior among the professionals and the issues regarding to the professionals ethics, theory of technology management.

REFERENCE(S):

1. Mohd Janib Johari, 2001, "*Etika Profesional*", Skudai UTM.
2. Mustafa Hj. Daud, 2001, "*Etika Pengurusan*" Kuala Lumpur: Utusan Pub and Dist..
3. Mike W. Martin & Roland Schinzinger, 2005, "*Ethics In Engineering*" New York, 4th Edition, Mc Graw Hill..
4. Raymond Spier 2001, "*Ethic, Tools And The Engineer*", CRC Pres LLC.

BDA 4052 ENGINEER AND SOCIETY

SYNOPSIS :

Development of engineering in community: Engineering and organization: role of engineer in public and private sector, responsibility of engineer, engineer as an agent of development. The relationship of human being in engineering management: Environment and engineering, ethics, professionalism and the regulations of engineering. Research and development of engineer, roles of private agency, contribution of engineer in corporate sector. Engineer in the new globalization.

REFERENCE(S):

1. Daniel L. Babcock and Lucy C. Morse, 2002, "*Managing Engineering and Technology - An Introduction to Management for Engineers*", 3rd Edition Prentice Hall Inc.
2. Abd. Rahim Abd. Manaf, 2005, "*Alam Jurutera*", Edisi 2, Penerbit Universiti Teknologi Malaya, Kuala Lumpur.

4. Abdul Rahim Abdul Manaf, 1996, *“Jurutera Dalam Masyarakat”*, Penerbit Universiti Malaya, Kuala Lumpur.

BDA 4904 BACHELOR’S DEGREE PROJECT II

PRE-REQUISITE: Bachelor’s Degree Project I

SYNOPSIS:

Bachelor’s Degree Project II (PSM II) is essentially a continuation of the work which was planned and partially completed in Bachelor Degree Project I (PSM I). At the end of this course, students are required to present the findings and the final product of their work that has been done over the two semesters.

REFERENCE(S):

1. Pejabat Pengurusan Akademik KUiTTHO, (2006), *Buku Panduan Menulis Tesis*, UTHM, Batu Pahat.
2. Jawatankuasa Kecil PSM FKMP (2008), *Buku Log Projek Sarjana Muda*, UTHM, Batu Pahat.
3. *Other academic REFERENCE(S) such as scientific journals, conference proceedings, text books, patents, standards, akademik articles, legal documents, scientific magazines, formal interviews etc.*

BD* 43 ELECTIVE II**
BD* 43 ELECTIVE III**

**YEAR 4
SEMESTER III**

BDA 4804 INDUSTRIAL TRAINING

PRE-REQUISITE:

SYNOPSIS:

Students are required to undergo industrial training as trainee engineers in mechanical engineering for a period of 12 weeks. Students will be required to follow industrial training schedule provided by the company for example planning, management, designing, evaluating, decision making, specialization and supervision. Assessment will be conducted by supervisors appointed from the faculty and the industry.

REFERENCE(S):

1. Industrial Training Log Book
