

WELCOMING SPEECH

Assalamualaikum wbt and greetings.

I would like to congratulate all new students at the Faculty of Civil and Environmental Engineering (FKAAS) UTHM for 2010/2011 academic session. All of you are very fortunate to be selected to enter this university, which is well-equipped with current infrastructure and a conducive learning environment. Being selected to this university is a great privilege that should not be wasted. This is due to the fact that the education process at the tertiary level requires continuous effort and commitment so that the knowledge gained can produce students who are excellent in all aspects in line with the needs of industry and the country.

In order to accomplish the University's mission which is to produce and train competitive professionals and technologists of high ethical values, all students will be guided by qualified, committed, and responsible academic staff. FKAAS offers academic programmes based on advanced civil engineering field as well as focuses on sustainable environment for universal prosperity. To enhance the students' understanding and creativity, the faculty provides laboratories complete with the latest equipment and assisted by well-trained technicians. Students will also have to undergo practical work in the field relevant to the current industrial needs.

Therefore, students must take this opportunity to work extremely hard in order to achieve the aspirations of not only their parents but also the community and the country. Systematic planning of teaching and learning will produce outstanding graduates.

That's all, thank you.

Prof. Dr. Abdul Aziz bin Dato' Abdul Samad
Dean, Faculty of Civil and Environmental Engineering
