

DEAN
FACULTY OF INFORMATION TECHNOLOGY AND
MULTIMEDIA

Message from the Dean

Assalamualaikum warahmatullahi wabarakatuh and a very warm welcome.

First and foremost as a Dean of Faculty of Information Technology and Multimedia (FTMM), I would like to welcome you as a new student for this academic session 2010/2011. I think it is still not too late for me to congratulate you and my sincere thanks for being selected and decided to further your studies in the field of Information Technology at FTMM specifically and UTHM in general.

In meeting the aim of UTHM in producing creative and quality graduates through the use of the latest art of teaching and learning, FTMM is offering various courses in the current discipline demanded by the current market in Information Technology (IT). The students would also be exposed to the teaching and learning methods that have high values in IT by assimilating relevant theoretical and practical aspects including the various visits to the IT industries during various educational visits and industrial training.

The opportunities given to students not only cater for IT fields but also other knowledge dimensions that should be grabbed by students while they are here at UTHM. It is wise that all students must set their goals to give continuous and maximum effort in achieving the best results not only in terms of academic goals but also not forgetting their personal development.

Lastly, God Willing, all members of FTMM will be giving their best efforts and services to serve the students in making sure to produce students that are excellent, well known and marketable in their future undertakings.

All the best.

Associate Prof. Dr. Rosziati binti Ibrahim
Dean
Faculty of Information Technology and Multimedia
