

# CHATGPT

## FRIEND OR FOE?

brought to you by CAD UTHM

# What is ChatGPT?

ChatGPT is a large language model developed by OpenAI, designed to understand and generate natural language text. It has the ability to respond to a wide range of questions and statements in a conversational manner based on MASSIVE training dataset of text from the internet. It is programmed to assist users with their inquiries to the best of its knowledge and abilities.

## STRENGTHS

### ChatGPT Capabilities

ChatGPT's main capability is to generate human-like responses to natural language input that is based on massive training data from the internet.

## WEAKNESSES

### ChatGPT Limitations

ChatGPT may occasionally generate and produce harmful and biased content.

# SWOT ChatGPT in Academic Settings

## OPPORTUNITIES

### ChatGPT Impacts to TnL

ChatGPT can provide quick and concise information of various topics and can potentially speed daily tasks for an academician.

ChatGPT can benefit a student by providing personalized assistance in answering questions, improving study skills, and offering valuable insights on various topics related to their field of study.

## THREATS

### Risks of using ChatGPT

ChatGPT may not always provide accurate or reliable information and can potentially lead to plagiarism or academic dishonesty if relied upon too heavily.

## STRENGTHS

# ChatGPT Capabilities

- **Natural Language Processing:** ChatGPT can interpret and respond to written or spoken language much like a human would.
- **Conversational Skills:** ChatGPT can engage in conversations with users, responding to their queries and creating a natural, human-like experience.
- **Knowledge Base:** ChatGPT has access to a vast amount of knowledge, allowing it to answer questions on a wide range of topics.
- **Personalization:** ChatGPT can learn and adapt to individual users, remembering their preferences and past interactions to create a more personalized experience.
- **Context Awareness:** ChatGPT can understand the context of a conversation and use that understanding to provide more relevant and accurate responses.

ChatGPT's main capability is to generate human-like responses to natural language input that is based on massive training data from the internet.

## WEAKNESS

# ChatGPT Limitations

- **Lack of transparency:** ChatGPT is a black box model, which means that it can be difficult to understand how it generates its responses. It is challenging to evaluate the accuracy and reliability of its outputs.
- **Data bias:** ChatGPT's responses is based on the data it has been trained on. It may generate a biased response. So be careful and read the response carefully before you use it.
- **Limited generalizability:** ChatGPT may not fully represent the range of language usage and cultural nuances that exist in real-world contexts. It may not really understand what you really mean and could provide inaccurate response.
- **Limited control over output:** As a language model, ChatGPT generates its own outputs based on the input it receives. While it is possible to provide prompts or constraints to guide its responses, there is no guarantee that the model will generate the desired outputs.

**ChatGPT may occasionally generate and produce harmful and biased content!**

## OPPORTUNITY

# ChatGPT for Academics

- 
- Providing **assistance with research and literature review** by suggesting relevant sources and providing summaries and insights.
  - Providing **assistance with language editing and proofreading** of academic papers.
  - Creating personalized **study plans and schedules** based on user goals and preferences.
  - Generating **questions and quizzes to aid in studying** and test preparation.
  - Providing **explanations and insights into complex concepts** and theories.
  - Generating **summaries and abstracts for academic articles** and papers.
  - Providing **citation and reference assistance**.
  - Generating **ideas and suggestions for research topics** and areas of study.

**ChatGPT can provide quick and concise information of various topics and can potentially speed up daily tasks**

## OPPORTUNITY

# ChatGPT for Students

- **Providing definitions and explanations:** ChatGPT can provide definitions and explanations of various academic concepts and terminology. This can be particularly helpful for students who are struggling to understand a specific topic or for those who need a quick refresher.
- **Answering questions:** ChatGPT can answer a wide range of questions related to various academic subjects. Students can ask questions about specific topics or concepts, and ChatGPT can provide detailed answers and explanations.
- **Generating summaries:** ChatGPT can generate summaries of long academic texts, such as research papers, articles, and books. This can save students time and effort in trying to read and understand complex academic material.
- **Getting started with ideas:** ChatGPT can generate writing prompts for students who are struggling to come up with ideas for their academic writing assignments. These ideas can be tailored to specific subjects and topics, and can help students develop their critical thinking and problem solving.

**ChatGPT can provide personalized assistance in answering questions, improve study skills, and offer valuable insights on various topics.**

## THREATS

# Risks of using ChatGPT

### **Inaccurate or unreliable information**

ChatGPT is not infallible and can make mistakes or provide incorrect information. As a result, students or researchers who rely solely on ChatGPT's responses may be at risk of using inaccurate or unreliable information in their academic work.

### **Ethical concerns**

There are ethical concerns associated with using AI models like ChatGPT in academic settings. For example, there may be questions about whether AI-generated work is truly the student's own work, or whether the use of AI models in academia exacerbates existing inequalities and biases.

### **Plagiarism**

If a student or researcher uses ChatGPT to generate text for an assignment or paper, they may inadvertently plagiarize material that was not properly attributed or cited.

### **Lack of critical thinking skills**

Relying too heavily on ChatGPT for research or writing can lead to a lack of critical thinking skills. Students may become accustomed to simply accepting whatever information ChatGPT provides without questioning it, which could harm their ability to evaluate sources and think critically.

### **Data privacy and security**

ChatGPT is powered by OpenAI, a private company that has access to a large amount of data generated by the model. There is a risk that personal or sensitive information could be inadvertently exposed or accessed by third parties, which could lead to privacy or security concerns.

**ChatGPT may not always provide accurate or reliable information and can potentially lead to plagiarism or academic dishonesty if relied upon too heavily.**

# ChatGPT: Points to Ponder

## Enrich Skills

ChatGPT can be used to help students to **enrich their Cognitive, Psychomotor and Affective skills** in problem-solving. 2.

## Expand Resources

ChatGPT can be used to **create new learning materials** such as lecture notes, presentation slides, and other educational content. 4.

## Verify References

1. ChatGPT may generate inaccurate information, citations and references. **Always verify the sources and references.**

## Simplify Tasks

3. ChatGPT can **automate and simplify routine tasks**. Therefore, we can spend more time on more complex tasks.

## Maintain Integrity

5. Recognize the capabilities and limitations of ChatGPT. **Use it appropriately, professionally and ethically.**

# Our Take on ChatGPT

Overall, ChatGPT has the potential to revolutionize higher education by making learning more **personalized, efficient, and accessible**. However, ChatGPT is not a miracle tool, and **there are potential risks** and challenges associated with its usage.

As such, it is important for academics and students **to carefully consider the benefits and drawbacks**. Therefore, implement appropriate safeguards to **ensure that ChatGPT is used professionally and ethically**.
